Downloading an app in the App Store

Learn how to download an app to your mobile phone from the App Store and to remove apps.

How to download a mobile app

- 1 Open the **App Store** application on your iPhone.
- 2 Browse the **Today, Games, Apps** or **Arcade** tabs to find apps you like. Or tap the Search tab to find something specific.
- 3 Tap the price or the **Get** button. If you see the **Open** button instead of a price or the **Get** button, you have already purchased or downloaded that app.
- 4 Press the side button on the right-hand side of your iPhone or the top button on your iPad twice to finalize your purchase. If you use Face ID or Touch ID to unlock your device, you can put your face up to the device or touch the main button to authenticate yourself and start the download. You may need to enter the password associated with your Apple ID to complete the download.

How to remove a mobile app

- 1 Press and hold the app.
- 2 Tap **Remove App** .
- 3 Tap **Remove App**, then **Remove** to confirm.
